

Having personally experienced the take-over of local radio stations by Clear-Channel Communications, the last thing we need is companies like CCC completely taking over the airwaves. Citizens have not even been allowed to review this FCC ruling. If the FCC allows broadcast media takeover then you are contributing to a totalitarian society! This decision will be a big contributor to "state-sponsored media." The Sherman Antitrust Act was passed to prevent monopolies and if you pass this ruling, CCC will monopolize the airwaves. That will be contrary to both American freedom and the journalism industry.
